

THE DEVASTATING HUMAN IMPACT OF DISPARATE HEALTH DATA

WHERE THERE ARE WALLS, THERE ARE CONSEQUENCES

It's virtually impossible to compile a patient's complete health history without access to their past visit locations and records across care settings.

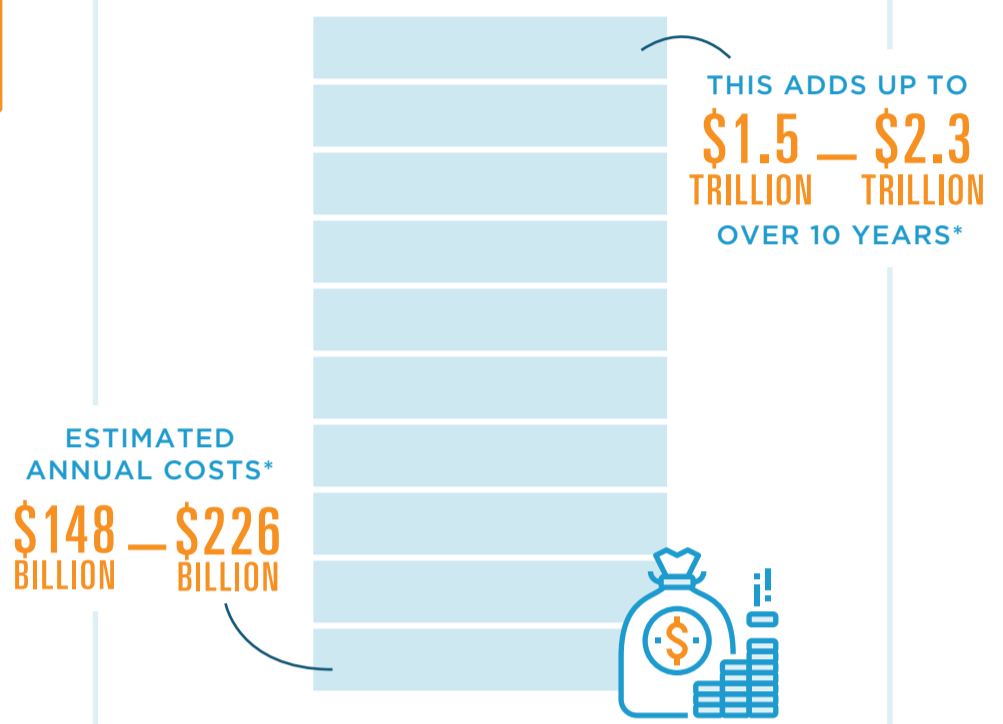

When providers lack comprehensive health data, everyone suffers

58%

OF ALL ACTIVITY WITHIN A REFERRAL REGION HAPPENS OUTSIDE THE WALLS OF THE LARGEST HOSPITAL IN THAT REGION*

LACK OF CARE COORDINATION COSTS BILLIONS EACH YEAR.

DATA SILOS CAN BE DEADLY

The economic cost of disparate health data is unfortunate, but what's worse is the human cost

A lack of complete and accurate actionable patient data at the point of care can lead to irreversible health problems and even death.

ONLY 12–34%

OF HOSPITAL DISCHARGE SUMMARIES REACH OUTPATIENT CARE TEAMS IN TIME FOR PATIENTS' APPOINTMENTS*

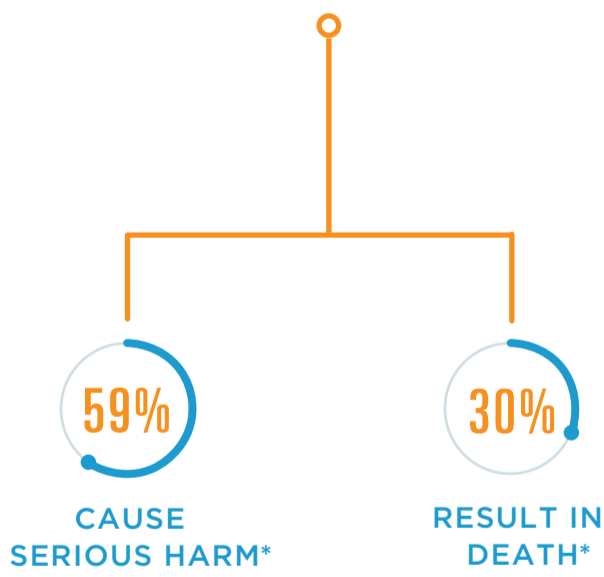

A KNOWLEDGE DEFICIT IS NOTED AS A CAUSAL FACTOR IN 48% OF DIAGNOSTIC ERRORS*

48%

59%

OF DIAGNOSTIC ERRORS HARM PATIENTS*

CRITICALLY ILL PATIENTS TRANSFERRED BETWEEN HOSPITALS ARE AT A HIGH RISK FOR ADVERSE EVENTS AND MORTALITY

TRANSFER DOCUMENTATION IS ONLY 58% COMPLETE*

58.3%

42%

ADVERSE EVENTS OCCUR IN 42% OF CRITICALLY ILL PATIENTS WITHIN 24 HOURS OF TRANSFER*

OVERALL HOSPITAL MORTALITY FOR THIS GROUP IS 17.3%*

17.3%

BREAKING DOWN BARRIERS LEADS TO BETTER CARE

Surescripts National Record Locator Service (NRLS) delivers actionable patient intelligence to EHRs in the form of real-time patient care histories from multiple care settings, specialties and locations, nationwide.

NRLS not only helps save money, it helps save lives

NRLS COVERS

FOUR BILLION

CARE INTERACTIONS

NRLS PROVIDES ACCESS TO VISIT LOCATIONS AND RECORDS FOR **230 MILLION** PATIENTS

20X MORE

THAN ANY OTHER RECORD LOCATOR SERVICE ON THE MARKET
